Last month we listened to a presentation by Bill Schultz on "The Coins of Great Britain" and took a second look at how stamps are fairing as an investment (not so bad – only off by 0.06%).

During the presentation we learned a bit about the old base-12 farthing-pence-shilling-pound system and their conversion to the decimal system.

This month, the topic will be the new watermark discovery published in the 24 August Linns by one of the discoverers, **Gerald Nylander**
