Cover Story

Mailbox Improvement Week, May 13–19, 2018

Each year, the Postal Service™ designates the third full week of May as “Mailbox Improvement Week” to encourage customers on city motorized, rural, or contract delivery service routes (formerly highway contract box delivery routes) to examine and, where necessary, improve the appearance of their mailboxes. Neat, attractive mailboxes make a significant contribution to the appearance of the countryside and streets in suburban areas. Mailbox Improvement Week calls attention to the need for providing mailboxes that are:

1. Approved by the Postmaster General.
2. Fully operational.
3. Designed to protect the mail from weather.
4. Safe to use.
5. Conveniently located.
6. Neat in appearance.
7. Large enough within allowable size limits to support the customer’s daily mail and package volume (see blue.usps.gov/delret/L4CityDelvry_GROWTH.htm).

Mailboxes designed to meet these seven important requirements help delivery and collection operations while improving service to the entire route. There are two main design groups of curbside mailboxes:

1. Non-locked designs (full or limited service):
 - a. Traditional design (see Exhibit A1, page 4).
 - b. Traditional design — wide; USPS® preferred (see Exhibit A2, page 4).
 - c. Contemporary design (see Exhibit B, page 4).
2. Locked designs (full or limited service):
 - a. Mail slot design.
 - b. Wide or large-capacity design; USPS preferred.

USPS-STD-7C governs the design and specifications of curbside mailboxes and includes provisions for improved product quality.

Notice 209

Postmasters must send Notice 209, *Mailbox Improvement Week*, to all rural and highway contract box delivery route customers the week before Mailbox Improvement Week as a reminder of the event. Postmasters may order Notice 209 through the U.S. Postal Service® eBuy2 ordering

system under the Material Distribution Center (MDC) eBuy2 catalog or the Touch-Tone Order Entry (TTOE) system.

The Postal Service Stock Number (PSN) is 7610-03-000-9145 and the Postal Service Identification Number (PSIN) is NOT209. If you already have a 10-digit access code for TTOE, please call 800-273-1509 to place your order. If you do not have an access code, call 800-332-0317 to register for TTOE.

City Motorized, Rural, and Contract Delivery Service Routes

Customers must only use approved traditional, contemporary, or locked full/limited service curbside mailboxes for new installations or replacements. When new delivery is established or extended, postmasters must ensure that customers use delivery equipment that the Postmaster General has approved. However, a customer may use a custom-built *curbside mailbox* if the local postmaster approves and the mailbox conforms generally to the same requirements as approved manufactured curbside mailboxes (i.e., relative to the flag, size, strength, and quality of construction).

Postmasters *do not have the authority* to approve mailbox systems, such as USPS-STD-4C wall-mounted units or cluster box units (CBUs), that the Postmaster General has not approved through the USPS® approval process.

Carriers on motorized city routes may continue to serve mailboxes that are designed primarily for use by customers receiving door delivery that have been erected and served under previous regulations (see Exhibit C, page 4). However, carriers must advise customers that they may only use approved curbside mailboxes when replacing these types of mailboxes. A list of approved curbside mailbox manufacturers appears on pages [8–14](#).

Exhibit C, Door Delivery

For motorized city routes, and where the use of street names and house numbers is authorized on rural and contract delivery service routes, the mailbox must display the number on the side of single mailboxes or on the door of grouped mailboxes. If the mailbox is on a street other than the one on which the customer resides, the street name and house number must be on the mailbox. When rural and contract delivery service route customers have assigned box numbers, the numbers must appear on the side of single mailboxes or on the doors of grouped mailboxes, visible to the approaching carrier. The street number, box number, and any other address information must be inscribed in contrasting color in neat letters and numerals not less than 1 inch in height. In all instances, placing the owner's name on the box is optional, but not recommended by the Postal Service.

The Postal Service encourages but does not require motorized city, rural, and contract delivery service route customers to group mailboxes whenever practical, especially where many mailboxes are located at or near crossroads, service turnouts, or similar locations. Customers must also paint mailboxes and supports/posts and keep them rust-free. The Postal Service prohibits advertising on mailboxes and mailbox supports.

In areas where snow removal is a problem, the Postal Service suggests using a semi-arch or extended arm-type support (see Exhibit D), which allows snowplows to sweep near or under mailboxes without damaging supports and provides easy access to the mailboxes by carriers and customers.

Generally, customers must install mailboxes at a height of 41–45 inches from the road surface to the bottom of the mailbox or point of mail entry. Also, customers must set mailboxes back 6–8 inches from the front face of the curb or road edge to the mailbox door. However, because of varying road and curb conditions and other factors, the Postal Service recommends that customers contact their local Post Office™ before erecting or replacing mailboxes and supports.

Location

Customers must place mailboxes on motorized city, rural, and contract delivery service routes so a carrier can safely and conveniently serve them without leaving his or her vehicle. The mailboxes must be on the right-hand side of the road in the carrier's travel direction in all cases where traffic conditions make it dangerous for the carrier to drive to the left to reach the mailboxes, or where doing so would constitute a violation of traffic laws and regulations. *Postal Operations Manual* (POM) 632.6 specifies postal regulations regarding mailbox locations for apartment houses and other multiple-unit dwellings.

On new rural and contract delivery service routes, all mailboxes must be on the right-hand side of the road in the direction of the route line. Mailbox placement must conform to state laws and highway regulations. City motorized, rural, and contract delivery service route carriers are subject to the same traffic laws and regulations as other motorists. Customers must remove obstructions, including vehicles, trash cans, and snow, that might impede safe and efficient delivery. Except when a mailbox is temporarily blocked, carriers must have access to the mailbox without leaving the vehicle, unless authorized to dismount.

Builders and USPS officials discuss the location of centralized delivery equipment during planning and before the start of construction whenever possible. Discussing equipment locations early in the process allows builders and USPS officials to determine the safest, most efficient equipment locations. By co-locating boxes, USPS and the building industry realize the best return on the investments of centralized delivery. Factors to consider when determining locations for centralized delivery equipment include the following:

- Co-locating delivery equipment.
- Carriers' line of travel.

- Customer and carrier safety.
- Customer accessibility (sufficient turnaround space or access for customers with mobility disabilities from nearest public right-of-way).
- Equipment security.

Mailbox Supports

The Postal Service does not regulate mailbox supports in any way except for purposes of carrier safety and delivery efficiency. Customers own and control posts and other supports for curbside mailboxes; they are responsible for ensuring that posts are neat and adequate in strength and size. Heavy metal posts, concrete posts, and miscellaneous items of farm equipment, such as milk cans filled with concrete, are examples of potentially dangerous supports. The ideal support is an assembly that bends or falls away when struck by a vehicle. Post or support designs may not represent effigies or caricatures that disparage or ridicule any person. Customers may attach the box to a fixed or movable arm. POM 632.5 specifies postal regulations for construction and placement of mailboxes and supports on motorized city, rural, and contract delivery service routes.

The Federal Highway Administration (FHWA) has determined that wooden mailbox supports no larger than 4 inches by 4 inches, or a 2-inch diameter standard steel or aluminum pipe, should safely break away if struck by a vehicle. According to FHWA, customers must also securely attach the mailbox to its post to prevent separation, if struck. See Exhibits E (page [6](#)) and F (page [7](#)) for examples of suggested mailbox mountings and supports from the FHWA.

Choose the Right Size and Make Your Mailbox Green

When selecting a curbside mail receptacle, customers may want to consider:

- A mail receptacle that can hold small packages, protect them from inclement weather, and offer a safe haven for packages that the carrier might otherwise leave on your doorstep.
- A mail receptacle that can hold larger packages so carriers can pick up outgoing packages through the USPS free Carrier Pickup™ program. Saving a trip to the Post Office saves fuel and time, and helps the environment.

Greener Mailboxes Lead to Greener Neighborhoods

When mailboxes are appropriately constructed, installed, and in good physical condition, the Postal Service delivers the mail safely and efficiently. Customers avoid a trip to the Post Office, which saves fuel and reduces carbon emissions.

However, the “greenest” form of centralized mail delivery systems are located in neighborhoods that serve multiple residents from a single location.

Sometimes referred to as “clustered mailboxes” or “community mailboxes,” these neighborhood mailbox centers offer the greatest amount of fuel savings and carbon emission reductions because carriers can deliver mail to multiple customers during a single stop with less truck idle time. Increasing the use of centralized delivery for new and existing customers helps the Postal Service create “greener” neighborhoods across the country.

In addition to fostering a sense of community, centralized delivery provides the added benefit of security for mail and package delivery as well as outgoing mail collection.

Cluster Box Units and All-Weather Parcel Lockers

During Mailbox Improvement Week, postmasters and managers or their designees must review all CBUs, neighborhood delivery and collection box units (NDCBUs), and outdoor parcel lockers (OPLs) in their delivery areas to identify any hazards or irregularities, and record the results of the review.

The Postal Service does not allow NDCBUs for use in new delivery or as replacement units for existing NDCBUs — even when privately purchased. Postal Service officials will not install Arrow locks in new NDCBUs or initiate delivery to NDCBUs installed as replacements.

After completing the reviews, keep a copy in the local office and send consolidated copies to the designated growth coordinator for each district. Use PS Form 8143, *Equipment Checklist and Followup Review*, for conducting and recording the reviews. PS Form 8143 is available in this *Postal Bulletin* (see Exhibit G on page 17). PS Form 8143 is also available on the PolicyNet website at blue.usps.gov/formmgmt/forms.htm. Employees who conduct the reviews must complete PS Form 1624, *Delivery/Collection Equipment Work Request*, for any equipment that poses a safety hazard to Postal Service customers or employees. You can order PS Form 1624 from the MDC using TTOE

(see page 3 for MDC ordering instructions). Use the following information to order PS Form 1624:

Wall-Mounted Centralized Mail Receptacles

USPS-STD-4C

The Postal Service fully implemented USPS-STD-4C on October 6, 2006. All new multi-unit construction with building permits submitted before October 6, 2006, retain the option of using apartment-style receptacles built to the specifications of USPS-STD-4B+.

All multi-unit construction with building plans submitted on October 6, 2006, or later are required to use wall-mounted mail receptacles built and approved to the specifications of USPS-STD-4C.

The receptacles offer:

- Improved compartment security.
- Customer-friendly compartment designs, which allow the carrier to place mail flat into the compartment.
- Increased ease-of-use for carriers.
- Larger customer compartment capacity for small parcels, rolls, and large volumes of mail.
- Ratios of one parcel locker for every 10 customer compartment for installations with 10 customer compartments or more.
- Integral outgoing mail compartments.

The Postal Service primarily intends the use of USPS-STD-4C boxes for new construction and not as a means of retrofitting existing complexes. However, the Postal Service may require buildings undergoing significant renovations or rehabilitations to convert to wall-mounted receptacles that are USPS-STD-4C compliant. If these renovations include significant structural changes and present an opportunity for more complete makeovers, the builders

must include 4C receptacles. The Postal Service does not consider buildings that are simply remodeling or changing the outward/surface appearance of the lobby examples of renovations that would trigger the use of 4C receptacles.

If you have additional questions, contact your area or district growth coordinators for further information, or send an email to wallmountedreceptacles@usps.gov.

Apartment House Mail Receptacles — Horizontal and Vertical

The Postal Service has revised USPS-STD-4B. The new standard is USPS-STD-4C. Security-enhanced versions of both horizontal and vertical boxes are now available for replacement of existing equipment. They are referred to as “USPS-STD-4B+” boxes and are designed to fit cleanly into buildings with old USPS-STD-4B boxes.

The Postal Service approves USPS-STD-4B+ boxes for mail delivery for existing indoor installations or existing protected outdoor locations. However, the Postal Service does not approve the purchase of this equipment for new installations and will not install Arrow locks in any such equipment. You may only order *replacement* parts for previously installed Postal Service-owned equipment.

Licensing

The U.S. Postal Service licenses two products for sale to customers other than USPS itself: a) customer compartment locks (O910A and B) used in centralized delivery equipment, and b) the CBU, which, when combined with the O910 lock, surpasses a required security level. Commercial manufacturers who wish to become licensed suppliers of either the O910 lock (USPS-L-1172D) or the CBU (USPS-B-1118G) must contact the following office for application procedures:

This proprietary USPS product uses the CBU platform to make it secure and suitable for outdoor use as an exterior PO Box alternative. Similar to locks used on interior PO Boxes, premium PO Box customer locks are also proprietary USPS products. Premium PO Boxes are available for purchase from the U.S. Postal Service only; they are not available to commercial customers.

Equipment Review Procedure

Employees must use the CBU and parcel locker equipment checklist and follow-up review procedure when examining the condition of CBUs, NDCBUs, and OPLs. You must:

1. List the unit's 5-digit, USPS-marked postal ID number. This is usually visible on the front or side of the body or pedestal. If a postal ID number is not available, list the unit location, equipment type, and manufacturer in the left-hand column. If you are able to access the back of the unit, list the unit's vendor-supplied serial number. You *must* distinguish the type listed as an NDCBU or CBU.
2. Assign each checklist item one of the following ratings:
 - a. OK — Equipment does not need attention for this item.
 - b. X — Equipment needs attention for this item.
 - c. NA — Item does not apply to this particular piece of equipment.
3. When examining the equipment, use the instructions below to complete PS Form 8143:
 - a. Check equipment. All delivery and collection equipment must be straight, vertical, and firmly mounted. For safety concerns, please ensure that customer compartments are facing away from the street or are oriented such that safe collection and delivery of the mail may occur. Visually verify that four bolts/nuts are firmly in place securing the pedestal to the concrete pad and to the delivery equipment. Apply hand pressure to the top edge of the unit from the front side. While the unit may flex under the load, verify that the pedestal stays firmly mounted to the concrete and that the unit does not separate from the pedestal.

- b. For safety concerns, ensure that customer compartments are located such that customers do not have to stand in the street to access their mail or that letter carriers do not have to stand in the street to deliver mail. Consider all factors of equipment location including setbacks from streets that may allow customer compartments to face the road, but at such a distance so as not to affect the safe delivery and collection of mail.
 - c. Check visible welds. Take note of cracked, broken, or rusted welds. For NDCBUs and OPLs only, tap the pedestal with a lightweight hammer, especially along the seams, to check for corrosion from the inside out or perforated corrosion.
 - d. For CBUs and NDCBUs, observe whether the carrier access door is locked and secure. Open it and observe whether it is bowed or warped and whether the door and locking bar operate smoothly. With the carrier access door open, check whether restraining devices prevent the two master doors from blowing closed. These devices, which you may have to set manually, must be serviceable.
 - e. Ensure that the Arrow lock operates smoothly and easily and that the mounting hardware is tight. For NDCBUs, CBU parcel doors, and OPLs, the protective cover that shields the Arrow lock from customer tampering or theft must be serviceable and firmly attached.
 - f. For OPLs, secure the cover that protects the Arrow lock from theft with the proper quantity of tamper-resistant screws.
 - g. Ensure that all customer access doors are present, closed, and locked with no visible damage or signs of forced entry. Check that customer door numbers are legible.
 - h. Ensure that the exterior surface of the unit is free from rust and graffiti.
 - i. Examine the unit for defects or damage and whether it reflects a proper Postal Service image.
 - j. Check whether the unit and any protecting structure appears watertight and in good repair. Look for any noticeable watermarks inside the unit or any wet mail.
 - k. Note any other conditions that require attention. Also, look for signs of vandalism such as pry marks on doors and locks.
4. Record the results of the inspection on the checklist.
 5. Submit the completed PS Form 1624 for each unit reviewed to the maintenance office responsible for centralized delivery equipment installation or repair in the area.

Carriers must note equipment deficiencies and report them to the postmaster, supervisor, or designee. The postmaster, supervisor, or designee must then submit PS Form 1624 to report the equipment defects. In addition, carriers must complete PS Form 1767, *Report of Hazard, Unsafe Condition, or Practice*, for items that pose an immediate threat to safety, such as an improperly secured or leaning NDCBU/CBU. You can order PS Form 1767 from the MDC by using TTOE (see page 3). Use the following information to order PS Form 1767:

PSIN:	PS1767
PSN:	7530-01-000-9422
Unit of Issue:	SE
Quick Pick Number:	141
Bulk Pack Quantity:	1000
Minimum Order:	25
Price:	\$0.0570

The postmaster or supervisor must immediately notify (by telephone) the office responsible for repair of reported hazards. The postmaster or supervisor must follow up to ensure that the work is satisfactorily completed and documented. The office responsible for repair must use its local buying authority to accomplish the repairs.

In January 1999, the Postal Service announced that NDCBUs cannot be installed for delivery of mail beginning in FY 2000. As previously stated, the Postal Service does not grant waivers for this policy. Place all orders for CBUs and OPLs against the national contracts. Use eBuy2 to place all orders.

For graffiti on mailboxes, there is a new soy-based cleaner available through eBuy or the MDC identified as "Cleaner, Graffiti Remover, Collection Box." To order, use PSN: 7930-13-000-4764; the cost is \$17.41 per 22 oz. bottle.

This product successfully removes graffiti from collection boxes. While most effective on the most current collection boxes, this cleaner may still prove effective with any legacy equipment that has a good quality paint coating. For older collection boxes, test the product in an inconspicuous spot to ensure it does not damage the current paint coating.

For eBuy2 ordering instructions, go to the Postal Service intranet at blue.usps.gov. In the left-hand column, click eBuy/eBuy2. You may also call 800-USPS-HELP for additional help.

State and Local Regulations

Some states have enacted laws that are more stringent and specific about the type of mailbox customers may use, the post or support customers must use to mount the mailbox, and the location of the delivery equipment. Regulations and recommendations published in this notice might not reflect appropriate requirements for your area. When

providing guidance to the public concerning mailbox placement and replacement, advise them not only of Postal Service regulations but also of any mailbox regulations enacted by state or local authorities. Further information is available from the following:

and Transportation Officials

Publicity

Postmasters must give these guidelines maximum local publicity. Consult your area Corporate Communications representative for assistance in publicizing Mailbox Improvement Week. The news release on page [18](#) can help postmasters promote Mailbox Improvement Week to daily or weekly newspapers or broadcast stations in their delivery area. Postmasters may also find it helpful to alert the media to locations of particularly interesting mailboxes in their delivery area.

Responsibility

Motorized city, rural, and contract delivery service route carriers must cooperate to ensure the success of this endeavor, and later report the results to the postmaster. In addition, postmasters must use the most up-to-date list of manufacturers and mailbox suppliers when providing motorized city, rural, and contract delivery service route customers with information about the type of box to install.

Mailbox Improvement Week Arrives in Time for Spring Cleaning

The U.S. Postal Service is asking all **[city name]** homeowners to inspect and repair their mailboxes during Mailbox Improvement Week, May 13–19, says Postmaster **[full name]**.

“Repairing suburban and rural mailboxes improves the appearance of our community and makes delivering and receiving mail safer for our carriers and customers,” **[last name]** says.

The Postal Service makes this annual request because of the wear and tear that occurs to mailboxes every year. “This is especially important after the effects of last winter,” **[he/she]** adds **[if applicable]**.

Some of the typical activities homeowners may need to do include:

- Replacing loose hinges on a mailbox door.
- Repainting a mailbox that may have rusted or has started to peel.
- Remounting a loosened mailbox post.
- Replacing or adding house numbers.

“If a homeowner plans to install a new mailbox or replace a worn one, he or she must use only Postal Service–approved traditional, contemporary or locking full/limited service mailboxes,” said **[last name]**. “Customers must be careful when purchasing curbside mail receptacles because the use of unapproved boxes is prohibited. Customers may use a custom-built mailbox, but they must consult with my office to ensure it conforms to guidelines applying to flag, size, strength and quality of construction.”

For more information on the use of names or numbers on mailboxes, or answers to any other questions, contact **[full name]** at **[phone number]** or call your local postmaster at **[phone number]**.

Invalid USPS Corporate Account Numbers

Provide this listing to Contract Postal Units and acceptance clerks in non-POS locations without intranet access to validate a USPS Corporate Account (USPSCA) number online. For all other locations, online USPSCA validation is preferred. This list supersedes all previous notices, which you must recycle.

Acceptance clerks must not accept Priority Mail Express® shipments bearing an invalid USPSCA number in the “Payment by Account” or “Agreement Number” section of the label or form.

Note: The first 6 digits of a 9-digit Custom Designed Service and Next Day Pickup Agreement make up the Corporate Account Number.

Verifying U.S. Postal Service Money Orders

Follow these steps to cash a Postal Service™ money order:

1. Check that the amount does not exceed the legal limit: \$1,000 for domestic, and \$700 for international Postal Service money orders.
2. Check that the proper security features are present:
 - When held to the light, a watermark of Benjamin Franklin is repeated from top to bottom on the left side.
 - When held to the light, a dark line (security thread) runs from top to bottom with the word “USPS” repeated.
 - When there is discoloration around the dollar amounts, this might indicate the amounts were changed.

These appear in Postal Service Notice 299, *U.S. Postal Money Order Reference Card*, or online at usps.com/shop/money-orders.htm.

3. If the money order seems suspicious, call the U.S. Postal Service Money Order Verification System at 866-459-7822.

Provide this information to local banks and retailers, as they also receive Postal Service money orders for cashing.

Overseas Military/Diplomatic Mail

Mail addressed to military and diplomatic post offices overseas is subject to certain conditions or restrictions of mailing regarding content, preparation, and handling. The APO/FPO/DPO table outlines these conditions by APO/FPO/DPO ZIP Codes™ through the use of footnoted mailing restrictions codes (see the [Restrictions](#) page following the table).

Acceptance clerks must use the table with the RSS terminal to determine which APO/FPO/DPO ZIP Codes are active and which conditions of mailing apply. Send inquiries to the Military Postal Service Agency at amps.usps.gov/jy2/frm.htm.

We have eliminated “Not Active” entries from the table below to save space and paper.

The following FAS Restrictions table outlines these conditions as listed by each affected FAS ZIP Code™ through the use of footnoted mailing restrictions codes (see the [Restrictions](#) following the table). For more information on available extra services for FAS destinations, see *Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM®)*, part 503.

DMM Revision: Combined Mailing Options for Periodicals and Bound Printed Matter Flat-Sized Pieces

Effective July 9, 2018, the Postal Service™ will revise *Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM®)*, section 705.15.1, to provide clarification on available options when combining flat-sized pieces and ensure consistency within the standards.

The Postal Service published Customer Support Ruling (CSR) PS-325, *Cobundling Several Periodicals Publications*, to provide another option for Periodicals mailers when combining flat-sized pieces. This option allows mailers to exceed the maximum weight of 20 ounces (by raising the limit up to 24 ounces) under certain circumstances. The Postal Service will revise CSR PS-325 to clarify that the heavier weight option is for flat-sized pieces combined under section 207.27, Combining Multiple Editions or Publications. The Postal Service will also add another option to CSR PS-325 that allows mailers to exceed the maximum weight of 20 ounces (by raising the limit up to 24 ounces) in certain circumstances under DMM 705.15.

Additionally, the Postal Service will publish newly implemented standard, CSR PS-349, *Combining Bound Printed Matter Flat-Sized Pieces*, to provide mailers with the option to exceed the maximum weight of 20 ounces (by raising the limit up to 24 ounces) in certain circumstances under DMM 705.15 for Bound Printed Matter (BPM) flat-sized pieces. While the option to include heavier weighted pieces under DMM 705.15 applies to both Periodicals and BPM, a mailer is only allowed to include either heavier weighted Periodicals or BPM pieces in a mixed-class mailing.

The Postal Service will revise DMM 705.15.1 to ensure consistent standards as a result of the changes to CSR PS-325 and the planned publication of CSR PS-349. Although the Postal Service will not publish this revision in the DMM until July 9, 2018, the standards are effective immediately.

Stamp Announcement 18-15: Flag Act of 1818 Stamp

On June 9, 2018, in Appleton, WI, the U.S. Postal Service® will issue the *Flag Act of 1818* stamp (Forever® priced at the First-Class Mail® rate) in one design, in a pressure-sensitive adhesive pane of 20 stamps (Item 477800). The stamp will go on sale nationwide June 9, 2018.

With this stamp, the Postal Service™ marks the 200th anniversary of the Flag Act of 1818, which provided the basic design of the current American flag: 13 stripes symbolizing the original 13 colonies and one star for each state in the Union. The stamp art features a flag with 20 stars, the number of states in the Union when the Flag Act of 1818 was implemented. The flag's crisp folds and layering effect convey a sense of the dynamism of the young nation. Ethel Kessler served as art director for the project with stamp design and typography by Kit Hinrichs.

Pictorial Postmarks Announcement

As a community service, the Postal Service™ offers pictorial postmarks to commemorate local events celebrated in communities throughout the nation. A list of events for which pictorial postmarks are authorized appears on the following pages. The sponsor of the pictorial postmark appears in italics under the date. Also provided are illustrations of these postmarks.

People attending these local events may obtain the postmark in person at the temporary Post Office™ station established there. Those who cannot attend the event but who wish to obtain the postmark may submit a mail order request. Pictorial postmarks are available only for the dates indicated, and *requests must be postmarked no later than 30 days following the requested pictorial postmark date.*

All requests must include a stamped envelope or postcard bearing at least the minimum First-Class Mail® postage. Items submitted for postmark may not include

postage issued after the date of the requested postmark. Such items will be returned unserved.

Customers wishing to obtain a postmark must affix stamps to any envelope or postcard of their choice, address the envelope or postcard to themselves or others, insert a card of postcard thickness in envelopes for sturdiness, and tuck in the flap. Place the envelope or postcard in a larger envelope and address it to: Pictorial Postmarks, followed by the Name of the Station, Address, City, State, ZIP+4® Code, as listed next to the postmark.

Customers can also send stamped envelopes and postcards without addresses for postmark, as long as they supply a larger envelope with adequate postage and their return address. After applying the pictorial postmark, the Postal Service returns the items (with or without addresses) under addressed protective cover.

How to Order the First-Day-of-Issue Digital Color or Traditional Postmarks

Customers have 120 days to obtain the first-day-of-issue postmarks by mail. Each cover must have sufficient postage to meet First-Class Mail® requirements. Customers may purchase new stamps at their local Post Office™, by phone at 800- 782-6724, or on The Postal Store® website at usps.com/shop.

Digital Color Postmarks

Only select stamp issues offer a digital color postmark. Customers may submit #6 or #10 envelopes constructed of paper rated as "laser safe." The Postal Service™ recommends envelopes of 80-pound Accent Opaque, acid-free, 9/16-inch side seams with no glue on the flap. The maximum size of all digital color postmarks is 2 inches high by 4 inches long. Allow sufficient space on the envelope to accommodate the postmark. Do not use self-adhesive labels for addresses on the envelope. Two test envelopes must be included. There is a minimum of 10 envelopes at 50 cents per postmark required at the time of servicing. Customers must submit a check, money order, or credit card for payment.

The Postal Service reserves the right to not accept hand-painted and other cachet envelopes that are not compatible with our digital color postmark equipment. The Postal Service also reserves the right to substitute traditional black rubber postmarks if use of nonspecified envelopes results in poor image quality or damage to equipment.

Customers must affix the stamps to the envelopes and address them to themselves or others for return through

the mail. Or, they may include an additional self-addressed return envelope, large enough to accommodate their canceled items, with sufficient postage affixed for return of their postmarked items. Address customer requests for digital color postmarks to:

FDOI – (Name of Stamp Issue)
USPS Stamp Fulfillment Services
8300 NE Underground Drive, Suite 300
Kansas City, MO 64144-9900

After applying the first-day-of-issue postmark, the Postal Service will return the envelopes to the customer by U.S. Mail®.

Traditional Postmarks
